EDUKRIPA

CLASS - 10 CBSE **SCIENCE TEST - 1** **Marks: 25**

(Chemical Reactions & Equations and Nutrition)

1. **Assertion (A):** Decomposition reactions are similar to combination reactions.

   Reason (R): Both reactions need a catalyst to occur.

   (a) A Both are true, R is correct explanation

   (b) A Both are true, R is not correct explanation

   (c) A is true, R is false

   (d) A is false, R is true

2. **Assertion (A):** Amoeba is not an omnivore organism.

   Reason (R): Lion is a carnivore organism.

   (a)A Both are true, R is correct explanation

   (b) A Both are true, R is not correct explanation

   (c) A is true, R is false

   (d) A is false, R is true

3. Which of the following statements about the given reaction are correct?

   $3Fe(s) + 4H_2O(g) \rightarrow Fe_3O_4(s) + 4H_2(g)$

   1. Iron metal is getting oxidised.

   2. Water is getting reduced.

   3. Water is acting as reducing agent.

   4. Water is acting as oxidising agent.

   (a) 1, 2 and 3 (b) 3 and 4 (c) 1, 2 and 4 (d) 2 and 4

4. Which one of the following involve a chemical reaction?

   (a) Heating magnesium wire in the presence of air at high temperature

   (b) Evaporation of water

   (c) Storing on nitrogen gas under pressure

   (d) Keeping petrol in a China dish in open

5. If copper is kept open in air, it slowly loses its shining brown surface and gains a green coating as shown. It is due to the formation of

   (a) $CuSO_4$ (b) $CuCO_3$ (c) $Cu(NO_3)_2$ (d) CuO

6. The reaction that differs from the rest of the reaction given is-

   (a) formation of calcium oxide from limestone

(b) formation of aluminium from aluminium oxide

(c) formation of sodium carbonate from sodium hydrogen carbonate

(d) formation of mercury from mercuric oxide

7. Magnesium ribbon is rubbed with sand paper before making it to burn. Why? [2]

8. Minerals needed by plants are taken up in inorganic form. Name two such forms. [1]

9. What are villi? Mention their functions. [2]

10. Name three chemical reactions in which heat is evolved and three chemical reactions in which heat is absorbed. [3]

11. Aqueous solutions of lead nitrate and potassium iodide are mixed together. What change in colour will you observe? Write a balanced equation for the reaction and the type of reaction. [3]

12. State the necessary conditions of autotrophic nutrition and name the by product. Mention the source of this by product. [3]

13. Draw a neat diagram of the alimentary canal and label the following parts: [5]

(i)The largest gland.

(ii)The gland that secretes digestive enzymes as well as hormones.

(iii)The part where digested food is absorbed.

(iv)Part in which starch digestion starts.

(v) Part in which bile is stored.

(vi) Part in which nutrients are absorbed.

(vii) Part in which water is absorbed.
